# Today's presentation

- Empower & Empower Energy Intelligence

- AI in Energy

- Knowledge creation at Empower EI

- Future & development

*"Artificial intelligence (AI), the ability of a digital computer or computer-controlled robot to perform tasks commonly associated with intelligent beings. The term is frequently applied to the project of developing systems endowed with the intellectual processes characteristic of humans, such as the ability to reason, discover meaning, generalize, or learn from past experience."* Britannica - 2019
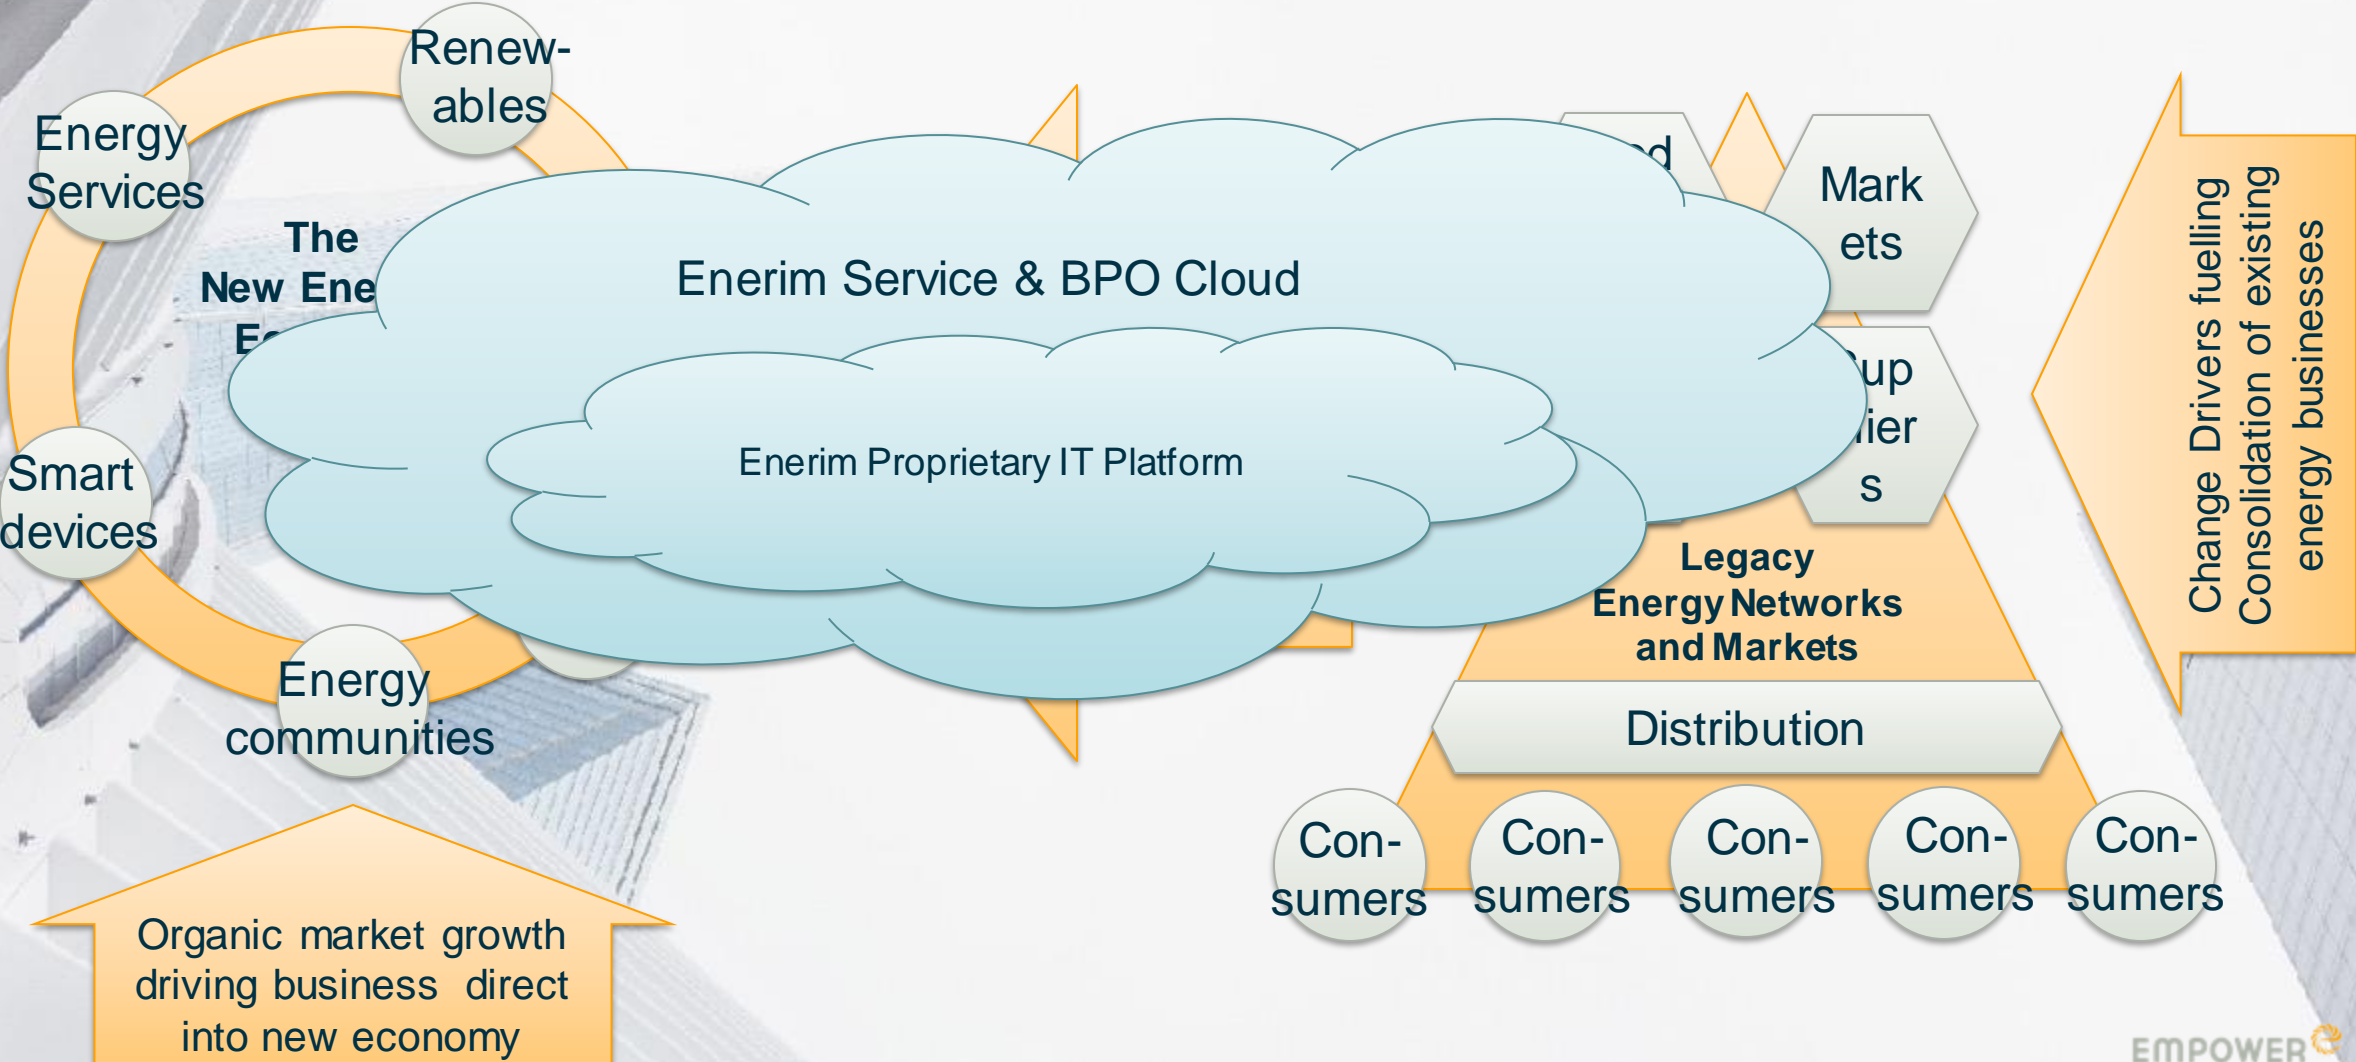

EMPOWER

# Empower in brief

**Empower is a multinational company realizing smart society essentials.**

The company develops digital platforms for customer needs utilizing profound domain competences of the service business ranging from building and maintaining electricity and telecom networks and maintaining factories and power plants to delivering information management systems and services to the energy sector. The company operates in the Nordic countries and in the Baltics.
